All Beaumont cast iron radiators are carefully hand built to your own required BTUs and fully assembled ready for plumbing into your new or existing pipework.

Burnishing is the optimum finish for the Warwick to accentuate the scrollwork. Burnishing paste is carefully applied by hand over a darker base coat.

The Warwick can be finished in a variety of colours – metallic, Farrow & Ball range, RAL colours or primed for onsite painting.

Because each radiator section is specially hand cast there may often be a slight variation in the length of each radiator once built (end bush to end bush), please allow for this in your pipework fittings.
