

Maximum comfort with HERZ

The thermostatic head is equipped with a setting point, marked with a heart, and offers optimal comfort. This system allows energy saving and corresponds to a room temperature of approx. 20 °C.

Troublefree operation by perfect closing

Thanks to the new sealing system of the thermostatic valve upper part, a perfect closing is guaranteed. The torus seal closes the valve face and permits trouble-free operation.

Continuous pre-setting through return valve

Through precise, continuous pre-setting, HERZ DE LUXE return valves allow accurate setting of the heating facilities. Colours matching the thermostatic heads and thermostatic valves complete the series.

Due to printing techniques, deviations of colours may be possible.

HERZ captivates through perfect combination

There is a trend away from beautiful shape, noble design towards mere functionality. The combination of engineering and aesthetics is becoming ever more important. The noble heads with intelligent interior combined with modern towel rails and design radiators give a noble appearance.

Come and see

HERZ-THERMOSTAT SERIES DE LUXE

Beauty and intelligence

Yes, come and see. Man has always been attracted by aesthetics and classical, beautiful shapes. The DE LUXE thermostat series offers your radiator shape, colour and functionality. It relieves monotony and brings colour to the world of heating! Perfect HERZ-technology combined with modern design – the product range of HERZ fulfils all your demands.

Serial perfection

Thermostatic heads, thermostatic valves, return valves and the respective accessories form a perfect unit of design and engineering. All parts are perfectly in tune with each other. Thanks to its wide range of applications the series can be used in various ways and independent of type of piping or radiators used.

Fully automatic control saves energy

DE LUXE thermostatic valves control room temperature fully automatically without any bulk energy. The hydro-sensor responds even to the slightest change in temperature and facilitates accurate control. Consequently it saves energy while increasing comfort.

HERZ brings colour to the world of heating

Escape the dull reality – colour your life and your radiator. The HERZ DE LUXE thermostat series is available in the following colours:

Pergamum
Aegean
Manhattan
Edelweiss
Calypso
Bahama beige
Greenwich
Jasmine
Matt black
Natural
Ultramarine blue (RAL 5002)
