

CASE STUDY

LIV YORK STREET STUDENT ACCOMMODATION

Scope

Space to host a student community of over 700 students. This will be incorporate a mix of shared apartments & studio rooms, spreading over 13 floors. The site includes a gym, cinema room, karaoke room, café, laundry & much more.

Apartments & Studios

Space saving solutions provided include:

- High output, cost effective, robust, vertical Radic Karado for the first fix of the project.
- Central connections. Excellent for first fixing, 50mm centres apart.
- Hertz 3000 twin body valves for all vertical radiators. Quick to install

Hall & Common Area

This area was fronted entirely with glass leaving no wall to attach heating solutions. Versatile provided project customised Runtal Radiators which were over 4 metres long with special welded feet to position in front of the glazed area.
