

PROJECT

SOUTH WEST COLLEGE
ENNISKILLEN

versatile

CLIENT

SWC Enniskillen

WHAT WE DID

SWC wanted to be at the forefront of sustainable energy consumption in college accommodation. We worked closely with the mechanical consultant (Semple and McKillop) and contractor (AEM) to provide an energy efficient heating system that achieved BREEAM certification. Due to its low water content heat exchanger, our NZEB radiator Strada, heats up and cools down quicker than a conventional radiator.

THE CHALLENGE

Ensuring energy efficiency was at the forefront throughout the project. Our site support service and specialist product delivery ensured the certification was achieved.

THE TEAM

Versatile | AEM | Semple & McKillop | Treacy Brothers | Mullarkey Pedersen.
