

AWARD WINNING PROJECT

UNIVERSITY HOSPITAL WATERFORD,
HSE ESTATES

CLIENT

HSE South East

THE CHALLENGE

The Dunmore Wing project for University Hospital Waterford has won a Green Good Design Award. A low-maintenance solution was required after install. The facility operator wanted security for their CapEx investment. These requirements were met with a tailored Versatile solution, with a 30 year bond back guarantee.

WHAT WE DID

We provided Jaga Maxi low water content radiators. These are tough with low temperature casing and exceptional performance. They provide an ideal heating solution for healthcare, with its solid smooth casing finish, anti-bacterial coating and low energy consumption.
